Junior PHP Backend Developer

Summary

A highly motivated and results-driven professional with a diverse background spanning roles in PHP Backend internship, assurance, and audit assistance, contributing to a well-rounded skill set and a comprehensive understanding of various domains.

Committed to fostering excellence and optimizing efficiency in all undertakings, consistently delivering added value to teams and organizations.

Over the preceding 7 months, I have spearheaded the development of 6 projects of varying complexity as part of the Jagaad Academy Program. Additionally, I continue to engage in project development encompassing diverse frameworks and complexity levels following the completion of the course.

A staunch advocate, I am characterized by my idealism, principled approach, and a deep sense of responsibility. Proficient in seamlessly blending analytical acumen with innovative problem-solving techniques, coupled with adept time management skills and a strong sense of empathy.
